

FAILSAFE CANADA INC.

Founded in 1994, Failsafe Canada Inc. is a business consulting organization specializing in technology enabled strategic planning and solutions development by using industry best practices. Failsafe offers proven and practical management consulting services, software application integration and development methodologies designed to assist mid-sized organizations become the benchmark within their industry.

OUR SERVICES: Our services are grouped into three broad practices:

Management Consulting - It helps when your consultants speak your language. Whether it's business or technical our consultants are committed to making your business vision a reality. In addition to business process analysis, project management, ROI analysis techniques, we deliver a range of executive-level services including executive strategy sessions, relationship visioning, planning workshops, research, white papers and articles.

Technology Consulting - We provide advanced skills in the areas of systems architecture, thin-client computing, business continuity and disaster recovery planning, as well as objective, requirements-driven vendor selection, contract negotiation and contract reviews.

Enterprise Business Applications - With the rapid advance of e-business and a requirement for stronger customer relations comes the business and technological challenges of satisfying internal enterprise requirements as well as vendors, partners, customers and clients that span your organizations entire supply chain. Whether it is business-to-business or business-to-consumer e-commerce, many factors come into play and Failsafe Canada's consultants can help you set and meet your business objectives.

Key areas include: Business Process Analyst (BPA), customer relationship management (CRM), commerce servers, enterprise resource planning (ERP), e-procurement, financial management systems, sales force automation and supply chain management, all with a focus on the mid-market enterprise.
