

WHO SHOULD DO THIS COURSE ?

- ▶ Individuals looking at a new career in carbon consulting
- ▶ Leaders within organisations heading up the “green team”
- ▶ Sustainability employees
- ▶ Entrepreneurs in green business
- ▶ Business owners or staff within organisations who would like to add carbon awareness or low carbon strategies to their offering

BENEFITS

- Add value to your company
- Explore this fast growing market
- Adapt with Climate Change
- Adapt to a changing economic climate
- Embark on a new career
- Enhance your skills
- Learn how to conduct carbon footprints

Failsafe Canada Inc; a leading Alberta GHG consultancy firm and The Global Carbon Exchange, an internationally recognized organization, have teamed up to present a Certified Carbon Footprint Analyst Course. This 3 day course has been created to train individuals and companies, on how to complete a Carbon Footprint Assessment, in accordance with global best practice.

Detailed Practical Examples are undertaken in the class using relevant case studies. Our courses are based on international standards (GHG Protocols and ISO 14064). Limited seating applies.

If you are involved in the GHG industry today, or are planning to be involved, register for this critically important course, April 14th, 15th and 16th 2010 at Failsafe Canada.

April 14th, 15th & 16th, 2010
The Sheraton Cavalier Hotel Theater Room
2620 32nd Avenue NE · Calgary Alberta Canada
